

Table S5. Prevalence of PIM category V (n=22,099)

Creatinine clearance at which action required	PIM category Va)	n (%)	Number of times
PIM prescribed			
< 30 mL/min	Colchicine	347 (1.57)	2 (1-5)
	Tramadol	182 (0.82)	1 (1-1)
	Spirolactone	44 (0.20)	1 (1-2)
	Ciprofloxacin	32 (0.14)	1 (1-1)
	Trimethoprim-sulfamethoxazole	10 (0.05)	1.5 (1-3)
	Amiloride	5 (0.025)	1 (1-1)
	Enoxaparin	5 (0.025)	1 (1-1)
	Dabigatran	1 (0.005)	1 (1-1)
	Fondaparinux	1 (0.005)	1 (1-1)
	< 50 mL/min	Ranitidine	2 (0.01)
< 60 mL/min	Gabapentin	149 (0.67)	1 (1-2)
Overall prevalence 3.05% (n = 675)			

Values are presented as number (%) or median (interquartile range).

In 12,795 patients (57.90%), estimated glomerular filtration rates (eGFR) were available.

PIM, potentially inappropriate medication.

^{a)}Listed in descending order of frequency.
