The approval statements of Institutional Review Board were not found in several articles among the original articles published in AGMR from September 2016 to March 2018. The description of ethical treatment of experimental animals was omitted in one article. The editorial office identified the authors of these articles had already received the approval of their Institutional Review Board when all submitted manuscripts arrived at the office. Therefore, the editorial office apologizes to the readers for these errors and publishes corrigendum as follows.
